Allowable Subject Matter

1. Claims 1-2 are allowed.
2. The following is an examiner's statement of reasons for allowance: The main reason for allowance of claims 1-2 is that the prior art does not show or make obvious a torque sensor as shown in claim 1. Applicant discloses a correcting part, which corrects a value corresponding to the torque determined from a phase difference between a first alternating signal and a second alternating signal, on the basis of a value difference between a first distortion indicator value and a second distortion indicator value. This limitation in combination with other limitations of the claims renders this case allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
